Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Bale et al. (6,687,601).

Regarding claim 1: Bale discloses a failure diagnostic system for an exhaust pressure increasing device, comprising: an intake channel and an exhaust channel in communication with cylinders of an internal combustion engine (see figure 1); exhaust pressure increasing device that increases an exhaust system pressure of said exhaust channel (see numeral 66); an intake system pressure detecting device provided in said intake channel, for detecting an intake system pressure (see numeral 102); and an exhaust pressure increase failure diagnostic section that determines as to whether the exhaust pressure increasing device has failed according to intake system pressure information obtained by said intake system pressure detecting device and a predetermined

failure diagnosis reference range (see figure 2; Table 1; column 10, lines 55 to 67).

Regarding claim 2: Bale discloses the exhaust pressure increase failure diagnostic section compares the intake system pressure information and, the predetermined failure diagnosis reference range, and determines that the exhaust pressure increasing device has failed when a maximum value of the intake system pressure in a predetermined period of time from a starting time point of communication between a combustion chamber in the cylinders and said intake channel lies outside the predetermined failure diagnosis reference range (see figure 2; column 8, line 62 to column 9, line 10).

Regarding claim 3: Bale discloses a failure notifying device that notifies a failure, wherein said failure notifying device notifies a failure when said exhaust pressure increase failure diagnostic section determines that the exhaust pressure increasing device has failed (see figure 2, numeral 166).

Allowable Subject Matter

3. Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claim 8 is allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zelalem Eshete whose telephone number is (571) 272-4860. The examiner can normally be reached on Monday to Thursday.
